

TREND PULSE

What is TRENDPULSE

What to shoot. Where to go. How to say it.

- AI Trend Intelligence for Travel Creators
- For creators who compete on timing, not just creativity
- Less guesswork. Better timing. Higher reach.

The problem we solve

Guesswork Decisions

Creators rely on intuition instead of data to pick destinations, topics, and keywords.

Missed Timing

Trends peak before creators finish shooting or editing.

High Production Risk

Changing trends make travel content costly and unpredictable.

Keyword Blind Spots

Creators lack visibility into rising keywords/hashtags, leading to poor topic selection.

Travel Creator Market Opportunity (US, 2025)

Travel Category Growth

Social Media → Travel Decisions

- 41% Travelers Inspired from **SNS**
- 65% **Gen Z** Influenced by SNS
- TikTok Travel content **+40%** (2024)

Travel Content Share: 25–30% of All Short- Form Views

- Travel ranks **Top 3** among Gen Z
- High shareability → Viral Driver

AI Creator Tools Adoption (2025 Projection): 70%+

- 72% of Gen Z creators
→ **Use AI tool more** in 2025
- AI = “default assistant”
for planning, scripting, editing, and analytics

background

2025 Market Opportunity for Travel Creators

2025 Creator Economy: \$500–600B

- Projected 18–22% CAGR through 2025
- Driven by short-form content, brand partnerships, and digital-native consumer spending

Creator SaaS (Mid/Small Creators): \$25–35B

- Growing demand for editing tools, monetization platforms, workflow automation, and vertical SaaS
- Mid/small creators are the fastest-growing SaaS adopter segment

Content Planning Support	Δ	X	O
Sentiment & Emotion Insights	X	X	O

Key Features

From scattered data to clear, actionable insights.

Regularly Updated Travel Trend Insights

TrendPulse aggregates Youtube, Reddit, signals every 2 hours to highlight what's rising across destinations.

Sentiment & Mood Analysis

Periodic sentiment processing provides a clear view of how people feel about each destination or trend.

AI Content Idea Generator

Based on the latest processed data, TrendPulse generates shot lists, hook phrases, thumbnail text, travel routes, and BGM suggestions.

AI Assistant

Ask questions and get insights powered by the most recently processed trend data.

MVP Architecture

Data Pipeline Architecture

User-Facing System

Separation of Concerns

- Scheduled background processing (every 2 hours)
- Fast and responsive user interactions
- Independent scaling for each system
- Pipeline failures or delays never affect user experience

Cost Estimation

Key Assumptions

Data Collection

- 10 Cities / 5 Topics
- Collection frequency: every 2 hours (12 runs/day)
- Data sources: Reddit, YouTube
- 200 calls/run → 2,400 calls/day → 72,000 calls/month

Data Processing

- 10 cities × 5 topics (brunch, cafe, date, nightlife, shopping) = 50 packages/run
- 50 × 12 runs = 600 calls/day → 18,000 calls/month

User Access (Core/API Lambda)

- Subscribers: 1,000
- DAU: 200 (Peak ~20%)
- Avg. search frequency: 4 per user/day
- 800 calls/day → 24,000 calls/month
