OBJECTIVE

Product Designer

Product-oriented problem solver with strong ownership and leadership, seeking to drive end-to-end product execution from strategy to launch. Experienced in aligning cross-functional teams around a clear product vision to deliver user-centered, scalable solutions with real business impact.

PROJECTS

AI-Based Budgeting & Insight App [@LINK](#) *OpenAI API, Next.js, Financial Data Modeling* Nov 2025 - Present
[Wally] An AI-driven personal finance platform that analyzes emotion-based spending patterns and delivers personalized budgeting advice through adaptive AI personas. Irvine, CA

- Defined product direction by linking emotional states to spending behavior, shaping core UX flows, AI personas, and interaction logic.
- Owned end-to-end product execution—from problem definition to a Next.js-based frontend—aligning decisions with user retention and engagement metrics.
- Drove user research (30+ surveys and interviews) and converted behavioral insights into actionable spending nudges, with over 60% of users reporting reduced unnecessary spending during usability testing.

AI-Powered Sprite Generation & Browser-Based Battle Game [@LINK](#) *Gemini 3, Next.js, React, JavaScript, Python* Sep 2025 - Present
[PIX.MO] An end-to-end AI-driven platform that enables users to generate pixel-art sprites via prompts and instantly experience them in a playable browser-based 2D battle game. Irvine, CA

- Built an AI-powered sprite generation platform owning product design, frontend implementation, and AI backend integration end-to-end, using Gemini 3, enabling users to create pixel-art characters via prompt-based interaction and immediately run and play games using the generated assets.
- Defined end-to-end user flows—from asset creation to in-browser gameplay—improving usability for non-technical users and achieving ~2× faster iteration and testing cycles compared to manual workflows.
- Implemented a responsive browser-based combat system, integrating state transitions, collision detection, damage handling, and animation loops to validate generated assets through direct gameplay.

AI-Driven Trend Intelligence Platform *AWS(OpenSearch Service, Bedrock), Next.js, React* Oct 2025 - Dec 2025
[TrendPulse] An AI-powered trend intelligence platform that aggregates and analyzes large-scale social and content data, transforming raw signals into structured, searchable insights for creators and businesses. Irvine, CA

- Drove system-level problem definition around fragmented trend data, designing a backend-first architecture to collect, process, and surface actionable insights from multiple external sources.
- Owned the full product pipeline—from backend architecture and data workflows to frontend experience design and implementation—aligning system decisions with scalability, reliability, and insight usability.

Interactive Exhibition [@4suho_god](#) *Exhibition, Mixed-Media Installation, Blender, Figma* Mar 2022 - Dec 2022
[Shabang Shabang: Finding the Spirits] An interactive installation project that transformed a physical space into a participatory narrative experience by combining sculptural installations, myth-inspired characters, and on-site AR interactions. Seoul, Korea

- Planned and executed an interactive installation exhibition that integrated physical sculptures, on-site AR Instagram filters, and participatory touchpoints, contributing to 10,000+ total visitors.
- Oversaw the full experience lifecycle—from spatial planning and visual identity to digital interaction design and promotional strategy—driving high on-site engagement and widespread social sharing across campus channels.

EXPERIENCE

UX/UI Design Intern - Famppy Inc [LINK1](#) [LINK2](#) [LINK3](#) *Figma, Monday, Midjourney* Mar 2025 -May 2025
Took ownership of a client-commissioned museum website redesign, identifying usability and visual hierarchy issues and leading the UI process from wireframes to final delivery. Seoul, Korea

Redefined the UI of APOC, the company's core service website, proposing and executing a new portfolio showcase and shareable template gallery to improve content accessibility and user engagement.

POSCO INFNELI Design Contest *Sketchup, Cinema 4D, 3D Modeling, Adobe Photoshop, Illustrator* Jun 2022 -Aug 2022
Led a site-adaptive pavilion system that improved air purification and energy utilization efficiency by approximately 20% compared to conventional public installations, based on spatial simulation and system modeling. Seoul, Korea

Exhibition Planning Lead / Experience Strategy Lead [@ksd_unkind](#) Mar 2022 -Sep 2022
Set the overall exhibition vision and strategy, translating an abstract concept into a scalable, narrative-driven spatial experience and defining direction across design, production, and marketing. Seoul, Korea

Owned cross-functional decision-making, resulting in a consistently delivered exhibition experience and 7,000+ total visitors.

EDUCATION

Kookmin University Mar 2021 – Present
Bachelor of Design in Spatial Design, Minor in Visual Design, Department Representative [GPA: 4.0]
Relevant Course: Psychology, Marketing, Business Seoul, Korea

Université Paris Cité, France Sep 2024 – Feb 2025
Bachelor of Communication & Business Paris, France

- Completed advanced coursework in Communication & Business, with a focus on cross-cultural communication and global marketing, collaborating with international teams from 6+ countries. Developed a market-entry business model adapting a beer brand for the South American market, delivering a final strategy presentation ranked in the top ~10% of the cohort.

SKILLS

Design UI/UX Design, Interaction Design & Prototyping, User Research & Usability Testing, Responsive Design, Accessibility, Design Systems & Component-Based Design, Figma, Google Analytics 4 (GA4 Certified), User Behavior Analysis, Experience Design, Information Architecture (IA), Journey Mapping, 3D Character & Spatial Design (Blender, SketchUp, 3ds Max, Rhino 3D)

AI AI Product Integration, Prompt-to-System Translation, Personalization Logic, Metrics-Driven Decision Making, AI Output Evaluation & Iteration, Human-in-the-Loop Design

Frontend HTML, CSS, JavaScript (ES6+),React, React Native, Next.js, State-Based UI & Interactive Systems, Performance Optimization, Visual Studio Code, Cursor, GitHub, Component-Based Architecture, Client-Side State Management

Backend Backend Integration, Supabase (Auth, Database, APIs), Firebase, Data Modeling, API Integration, Python (Data Processing & Scripting), Serverless

Language English (Fluent), Japanese (Intermediate), French (Basic)
